SUMMARY

Information Technology Engineering student and Google Student Ambassador driven by a philosophy of lifelong learning. Combines engineering precision with creative flair, showcasing skills in software development, full-stack web applications, and digital user experiences. Proven track record in campus leadership and community engagement, leveraging core IT coursework alongside open electives in Finance and Human Resource Management to build comprehensive, impactful solutions.

TECHNICAL SKILLS & HIGHLIGHTS

- Core IT Coursework:** Advance Data Structure and Algorithms, Computer Networks & Design (Wireshark, NS2), Operating Systems (Linux/Unix), DBMS (MySQL), Theory of Computation
- Languages & Web:** Java, C, Python, SQL, HTML5, CSS3, JavaScript
- AI & Dev Tools:** Gemini, ChatGPT, Antigravity, Perplexity, Comet, Claude, Copilot, Google AI Studio, Cursor AI, VS Code, Git, OpenCV, PyTorch
- Open Electives:** Finance, Human Resource Management
- Spoken Languages:** English (Fluent), Hindi (Native), German (Elementary / A1)
- Extra-Curriculars:** Photography & Writing. Featured photographer for the "Heritage Trails Tamil Nadu" initiative, with work exhibited at the Government Museum Chennai.

WORK EXPERIENCE

- Campus Ambassador – E-Cell, IIT Bombay** Jun 2026 – Present
- Selected to represent IIT Bombay's Entrepreneurship Cell on campus, driving technical awareness, cross-college collaboration, and startup culture ecosystems.
- Student Ambassador – Google** May 2026 – Present
- Selected for the 2026 cohort to advocate for Google AI technologies, bridging the gap between innovative enterprise technologies and the campus community.
 - Foster a culture of peer-to-peer learning and technological growth by hosting hands-on workshops and implementing AI solutions via the Agent Development Kit.
- Web Development Intern – QSkill (SR India)** Jan 2026 – Feb 2026
- Developed full-stack web applications using HTML, CSS, and JavaScript, focusing on seamless frontend experiences and streamlined backend code logic.
 - Built practical feature sets including API handling and database integrations for a Razorpay payment gateway clone and a Spotify song downloader.
- Graphic Design Intern – InAmigos Foundation** Sep 2025 – Oct 2025
- Created intuitive digital creatives and promotional campaign materials to enhance social media engagement, matching aesthetic layout rules with brand criteria.
- Core Member – ABIT (Association of Budding Information Technocrats)** Sep 2024 – Present
- Marketing & Publicity Team:** Plan, strategize, and execute campus-wide promotional models to boost event outreach and active student participation.
 - Digital Creative Team:** Crafted visual branding architectures, digital graphics, and event collaterals to amplify the department's technical presence.

EDUCATION

- Bachelor of Engineering in Information Technology** 2024 – 2028
MCT's Rajiv Gandhi Institute of Technology, University of Mumbai CGPA: 8.59/10
- 12th Grade (CBSE)** 2024
Kendriya Vidyalaya Bhandup, Mumbai Grade: 81%
- 10th Grade (CBSE)** 2022
Kendriya Vidyalaya Mandapam, Tamil Nadu Grade: 96% (National Ranker - Top 1.5% nationwide)

PROJECTS

Aegis Gateway – Zero-Trust AI Security Proxy: A zero-trust AI security proxy that intercepts, scores, and controls every AI agent tool call before it executes. Built a dual-layer detection system combining a 16-pattern heuristic threat engine with Groq and Gemini AI analysis, an additive risk scoring model (0.0–1.0), human-in-the-loop approval queue with real-time dashboard, honeypot deception layer, and SHA-256 signed tamper-evident audit logs. Deployed live with Next.js on Vercel and a persistent Node.js proxy on Render backed by Supabase PostgreSQL with real-time WebSockets. Selected for the Hackverse National Level Hackathon Flagship Event at Microsoft Hyderabad (July 25).

AttenTrack – Attendance Tracker & Simulator Application: An elegant, interactive attendance simulation web app built using vanilla HTML5, ES6+ JavaScript, and CSS3 custom properties with backdrop filters (glassmorphism UI layout). Integrates client-side OCR parsing via Tesseract.js & PDF.js for automated schedule uploads, features a smart "What-If" simulator to predict safety status, and incorporates Firebase SDK (Authentication & Firestore Database) for live data sync.

BioSim – Bacterial Evolution Simulator: Developed BioSim, a Streamlit-based bacterial growth simulator with AI-powered antibiotic resistance prediction, real-time visualizations, and biological data export using Scikit-Learn and Python. (Finalist - HackBio Hackathon by IIT Mandi)

Quiz Application: Physics, Chemistry, Maths (JEE Pattern) using Python.

AgriLink & Co: Online crops selling website using AI and HTML, CSS.

Chatting Application: Developed a real-time Java-based chat application using socket programming and multithreading for seamless two-way communication between users.

Razorpay Clone: Built a responsive frontend replica of the Razorpay interface using HTML, CSS, and JavaScript.

Hotel Sky Lark Website: Developed a responsive business website for hotel services and customer engagement.

Parlour Website: Created a service-based website with appointment interface and clean UI design.

Flappy Bird Game: Developed a Flappy Bird-inspired browser game using HTML, CSS, and JavaScript, implementing real-time animations, collision detection, DOM manipulation, and score tracking.

Heritage Trails Tamil Nadu: Participated in a cultural heritage initiative; photographs captured were exhibited at Government Museum Chennai.
